THINK
INNOVATION.
THINK RMB.

RMB is proud to launch a global first – the Krugerrand Custodial Certificate – which enables institutional and individual investors to have direct ownership in listed, physical gold.

This financial innovation introduces unprecedented liquidity into the direct, numbered and named ownership of physical Krugerrands. Cost efficiency is achieved by removing investment fees. Ownership is direct and all investors have access to their physical coins. RMB continues to bring innovative new products to the precious metals market – the KCC being the latest.
